ATIF MUBASHAR

Full Stack Software Engineer | Agentic AI · LLM · RAG | Node.js · React.js · TypeScript · Python

Lahore, Pakistan | atifmubashar353@gmail.com | +92 309 1560034 | linkedin.com/in/atifmubashar-dev | atifmubashar.vercel.app

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2 years of professional experience delivering production web applications across 5+ platforms, with a strong backend focus on Node.js, Express.js, MongoDB, and PostgreSQL. Experienced in REST API development, JWT authentication, role-based access control, WebSocket real-time features, and third-party integrations (payment gateways, AWS S3), alongside React.js and TypeScript frontend work. Builds LLM-powered applications, including agentic workflows with LangGraph and tool calling, and RAG pipelines with LangChain, Gemini, and FAISS. Collaborates in Agile/Scrum teams using Git and GitHub.

TECHNICAL SKILLS

AI & LLM Engineering: LLM Applications, Agentic AI, RAG, LangChain, LangGraph, Tool Calling, Embeddings, FAISS, Gemini

Languages: TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, Responsive UI Design

Backend & APIs: Node.js, Express.js, FastAPI, RESTful APIs, Middleware, Service Layers, Request Validation, Error Handling

Databases: MongoDB, PostgreSQL, MySQL, Supabase, Schema Design, Query Optimization, Indexing

Authentication & Integrations: JWT, RBAC, WebSockets, Socket.io, Webhooks, Payment Gateways, Third-Party APIs

Cloud & Tools: Amazon S3 (AWS), Git, GitHub, Docker (fundamentals), Render, Vercel, CI/CD Workflows

Practices: Agile/Scrum, Automated Testing, Debugging & Refactoring, Code Maintainability

AI-Assisted Development: Cursor IDE, Claude (Anthropic), OpenAI Codex

PROFESSIONAL EXPERIENCE

Software Engineer

Sep 2024 – Present

Prisma Technologies — Lahore, Pakistan (On-site)

- Developed full stack features for 5+ production platforms, working end-to-end from database schema and API design through frontend integration using React.js, Node.js, Express.js, MongoDB, and PostgreSQL.
- Built 30+ RESTful APIs covering authentication, RBAC, service layers, middleware, and validation logic for multi-role applications.
- Implemented JWT-based authentication and role-based access control (RBAC) to secure APIs across production platforms.
- Developed WebSocket-based real-time features for push notifications, live GPS tracking, and status updates across 3+ production modules.
- Integrated 4+ third-party services, including payment gateways (PayFast, Mollie, Deposyt) and AWS S3 cloud storage, and handled webhooks from external services.
- Optimized database queries and applied indexing across 10+ modules to improve backend responsiveness.
- Debugged and resolved 50+ production and development issues, including refactoring legacy backend code for maintainability.
- Used AI-assisted development tools (Cursor IDE, Claude, OpenAI Codex) to support development, debugging, and code review.
- Collaborated with frontend developers, QA engineers, and product stakeholders in Agile/Scrum sprints, using Git/GitHub to translate requirements into working, maintainable software.

KEY PROJECTS

DocMind AI — Document Q&A Assistant (RAG)

Jun 2026 – Jul 2026

Personal Project | Python, FastAPI, LangChain, Gemini, FAISS, React, Node.js, Supabase

- Built a document assistant that lets users upload PDFs and ask questions across documents, with source citations and page references.
- Developed a RAG pipeline using text extraction, chunking, embeddings, and FAISS semantic search.
- Added context relevance checks, optional web-search fallback, streaming responses, authentication, and saved chat history.

SupportPilot AI — Agentic Customer Support Platform

Aug 2026 – Sep 2026

Personal Project | TypeScript, React, Node.js, Express, MongoDB, LangChain, LangGraph, Gemini

- Built a full stack support application with customer chat, order requests, refund approvals, and human-agent handoff.
- Implemented LangGraph workflows and tool calling to route requests to specialist agents, with user confirmation before order changes.
- Added knowledge retrieval for policy questions, agent execution logs, and automated tests for support workflows.

Kapasi Glass Network — B2B Construction Workflow Platform *Dec 2024 – Jul 2026*

Prisma Technologies

- Developed 25+ RESTful APIs for a B2B platform managing clients, bids, jobs, purchase orders, job tickets, documents, and field measurements across 6+ business modules.
- Designed relational database schemas connecting clients, bids, purchase orders, job tickets, and field measurement data.
- Built bid and job management workflows for project creation, bid tracking, purchase orders, and job tickets.
- Implemented field measurement functionality allowing technicians to upload, annotate, and store measurement data on documents and images.
- Integrated AWS S3 for secure document and image handling, including storage, retrieval, and signed URL generation.

ScholarWheels — School Transport Management Platform *Sep 2025 – Apr 2026*

Prisma Technologies | Node.js, Express.js, MongoDB

- Designed backend data models across 5+ modules, including driver onboarding, vehicle assignment, ride scheduling, route configuration, and student tracking.
- Built 20+ RESTful APIs using Node.js, Express.js, and MongoDB to support transport management workflows.
- Developed 4+ ride and route management workflows covering trip planning, pickup/drop-off coordination, driver allocation, and real-time status tracking.
- Implemented validation, error handling, and controller logic across 15+ API operations for data accuracy and maintainability.
- Collaborated with 3+ team members to test API flows, resolve integration issues, and prepare features for production.

Afrivalley MarketPlace — eCommerce & Money Transfer Platform *Nov 2025 – Feb 2026*

Prisma Technologies | www.afrivalley-marketplace.com

- Contributed to backend development for a multi-role eCommerce and money transfer platform supporting Admin, User, Seller, and Agent dashboards.
- Integrated the PayFast payment gateway, implementing transaction handling and payment status updates.
- Debugged backend and frontend issues across APIs, business logic, and database queries to improve platform stability.
- Refactored backend modules to improve code maintainability and API reliability.

Examencentrum — Driving License Quiz & Practice Exam App *Mar 2025 – Jun 2025*

Prisma Technologies

- Built 25+ RESTful APIs for a multi-role exam platform supporting Admin, Instructor, and Candidate workflows, including question bank and exam management.
- Integrated AWS S3 for secure media handling, including signed URLs and file type validation.
- Developed admin dashboard APIs and candidate analytics features tracking accuracy rates and performance trends.

Course Activity Management & Monitoring System (CAMMS) *May 2025 – Dec 2025*

Final Year Project (Academic) | Node.js, Express.js, React.js

- Built a full stack web application to automate instructor workflows, task tracking, and LMS activity reporting using Node.js, Express.js, and React.js.
- Developed 8+ backend modules for activity tracking, ticket handling, assignment uploads, grading, and session logging, secured with JWT authentication and RBAC for 3 user roles.
- Built a responsive React.js dashboard with progress tracking, automated reporting, and Excel/PDF export functionality.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Claude Platform 101 — Anthropic
- Building with the Claude API — Anthropic
- Claude 101 — Anthropic
- AI Capabilities and Limitations — Anthropic

EDUCATION

- Bachelor of Science in Computer Science — Virtual University of Pakistan | CGPA: 3.62 / 4.00
- Intermediate (Pre-Engineering) — Punjab College, Lahore
- Matriculation (Science) — Govt. Central Model School, Lahore
